Assessing Genetic Risks Institute of Medicine, Committee on Assessing Genetic Risks, 1994-01-01 Raising hopes for disease treatment and prevention, but also the specter of discrimination and designer genes, genetic testing is potentially one of the most socially explosive developments of our time. This book presents a current assessment of this rapidly evolving field, offering principles for actions and research and recommendations on key issues in genetic testing and screening. Advantages of early genetic knowledge are balanced with issues associated with such knowledge: availability of treatment, privacy and discrimination, personal decision-making, public health objectives, cost, and more. Among the important issues covered: Quality control in genetic testing. Appropriate roles for public agencies, private health practitioners, and laboratories. Value-neutral education and counseling for persons considering testing. Use of test results in insurance, employment, and other settings.

Early Childhood Assessment National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Board on Children, Youth, and Families, Committee on Developmental Outcomes and Assessments for Young Children, 2008-12-21 The assessment of young children's development and learning has recently taken on new importance. Private and government organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement, and contribute to better outcomes for

children. This book affirms that assessments can make crucial contributions to the improvement of children's well-being, but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used. Early Childhood Assessment addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments.

SAGE Handbook of Research on Classroom Assessment James H. McMillan,2013 The Sage Handbook of Research on Classroom Assessment provides scholars, professors, graduate students, and other researchers and policy makers in the organizations, agencies, testing companies, and school districts with a comprehensive source of research on all aspects of K-12 classroom assessment. The handbook emphasizes theory, conceptual frameworks, and all varieties of research (quantitative, qualitative, mixed methods) to provide an in-depth understanding of the knowledge base in each area of classroom assessment and how to conduct inquiry in the area. It presents classroom assessment research to convey, in depth, the state of knowledge and understanding that is represented by the research, with particular emphasis on how classroom assessment practices affect student achievement and teacher behavior. Editor James H. McMillan and five Associate Editors bring the best thinking and analysis from leading classroom assessment researchers on the nature of the research, making significant contributions to this prominent and hotly debated topic in education.

All In Startup Diana Kander,2014-06-30 If Owen Chase can't find a way to turn his company around in the next nine days, he'll be forced to shut it down and lay off all of his employees. He has incurred substantial debt and his marriage is on shaky ground. Through pure happenstance, Owen finds himself pondering this problem while advancing steadily as a contestant at the World Series of Poker. His Las Vegas path quickly introduces him to Samantha, a beautiful and mysterious mentor with a revolutionary approach to entrepreneurship. Sam is a fountain of knowledge that may save his company, but her sexual advances might prove too much for Owen's struggling marriage. All In Startup is more than just a novel about eschewing temptation and fighting to save a company. It is a lifeline for entrepreneurs who are thinking about launching a new idea or for those who have already started but can't seem to generate the traction they were expecting. Entrepreneurs who achieve success in the new economy do so using a new scientific method of innovation. All In Startup demonstrates why four counterintuitive principles separate successful entrepreneurs from the wanna-preneurs who bounce from idea to idea, unable to generate real revenue. You will likely get only one opportunity in your life to go all in on an idea: to quit your job,

talk your spouse into letting you drain the savings account, and follow your dream. All In Startup will prepare you for that all in moment and make sure that you push your chips into the middle only when the odds are in your favor. This book holds the keys to significantly de-risking your idea so that your success appears almost lucky. Join Owen and Sam for this one-of-a-kind journey that will set you on the right path for when it's your turn to put everything on the line.

Fundamentals of Credit and Credit Analysis Arnold Ziegel, 2015-01-14 Arnold Ziegel formed Mountain Mentors Associates after his retirement from a corporate banking career of more than 30 years at Citibank. The lessons learned from his experience in dealing with entrepreneurs, multinational corporations, highly leveraged companies, financial institutions, and structured finance, led to the development and delivery of numerous senior level credit risk training programs for major global financial institutions from 2002 through the present. This book was conceived and written as a result of the development of these courses and his experience as a corporate banker. It illustrates the fundamental issues of credit and credit analysis in a manner that tries to take away its mystery. The overriding theme of this book is that when an investor extends credit of any type, the goal is to get your money back, and with a return that is commensurate with the risk. The goal of credit analysis is not to make yes or no decisions about the extension of credit, but to identify the degree of risk associated with a particular obligor or a particular credit instrument. This is consistent with modern banking industry portfolio management and the rating systems of credit agencies. Once the riskiness of an obligor or credit instrument is established, it can be priced or structured to match the risk demands or investment criteria of the entity that is extending the credit. A simple quote from Mr. J. P. Morgan is used often in this text - Lending is not based primarily on money or property. No sir, the first thing is character. This statement represents one of the conflicts in modern credit analysis - that of models for decision making versus traditional credit analysis. The 2008 financial crisis was rooted in the mortgage backed securities business. Sophisticated models were used by investors, banks, and rating agencies to judge the credit worthiness of billions (and maybe trillions) of dollars worth of residential mortgage loans that were packaged into securities and distributed to investors. The models indicated that these securities would have very low losses. Of course, huge losses were incurred. Mr. Morgan had a good point. In this case it was both property and character. The properties that were the collateral for many of the mortgages had much less value than was anticipated. The valuation of the collateral was naive and flawed. Many assumptions were made that the value of homes would rise without pause. Many mortgage loans were made that were at or even above the appraised value of a residence. But character was a huge, perhaps larger, factor behind these losses. Many of the residential mortgage loans were made to individuals who knew that they did not have the income to make the required payments on the mortgages. Many of the mortgage brokers and lenders who made these loans also knew that many of the borrowers were not properly qualified. And, many of the bankers who securitized these loans also may have doubted the credit quality of some of the underlying mortgages. If bankers and rating agencies understood the extent of the fraud and lax

standards in the fundamental loans backing the mortgage securities, or were willing to acknowledge it, the fiasco would not have occurred.

Asset Recovery Handbook Jean-Pierre Brun, Larissa Gray, Clive Scott, Kevin Stephenson, 2011-01-18 This handbook is designed as a 'how-to' manual that guides practitioners as they grapple with the strategic, organizational, investigative, and legal challenges of recovering assets that have been stolen by corrupt leaders and hidden abroad.

Effective Learning in Classrooms Chris Watkins, Eileen Carnell, Caroline Lodge, 2007-03-12 `The book is at once accessible, evidence-based, practical and eminently readable...Readers will find in this book a treasury of learners' voices guiding us towards the goal of more effective learning in classrooms' - International Network for School Improvement `This book promotes an ambitious and inspiring conception of meaningful pedagogy and works to applaud those teachers who are determined to reflect upon, enquire into, and then facilitate "effective learning". A coherent and structured case is made for the primacy of "learning" over "work" - Learning & Teaching Update This book addresses an important, and too seldom addressed issue: learning. Not teaching, not performance, not work: this book really is about learning, what makes learning effective and how it may be promoted in classrooms. The authors take the context of the classroom seriously, not only because of its effects on teachers and pupils, but because classrooms are notorious as contexts which change little. Rather than providing yet more tips, they offer real thinking and evidence based on what we know about how classrooms change. Four major dimensions of promoting effective learning in classrooms are examined in depth: Active Learning; Collaborative Learning; Learner-driven Learning and Learning about Learning. Evidence from practising teachers in the form of case studies and examples, and evidence from international research in the form of useful ideas and frameworks is included.

Ask a Manager Alison Green, 2018-05-01 'I'm a HUGE fan of Alison Green's Ask a Manager column. This book is even better' Robert Sutton, author of *The No Asshole Rule* and *The Asshole Survival Guide* 'Ask A Manager is the book I wish I'd had in my desk drawer when I was starting out (or even, let's be honest, fifteen years in)' - Sarah Knight, New York Times bestselling author of *The Life-Changing Magic of Not Giving a F*ck* A witty, practical guide to navigating 200 difficult professional conversations Ten years as a workplace advice columnist has taught Alison Green that people avoid awkward conversations in the office because they don't know what to say. Thankfully, Alison does. In this incredibly helpful book, she takes on the tough discussions you may need to have during your career. You'll learn what to say when: · colleagues push their work on you - then take credit for it · you accidentally trash-talk someone in an email and hit 'reply all' · you're being micromanaged - or not being managed at all · your boss seems unhappy with your work · you got too drunk at the Christmas party With sharp, sage advice and candid letters from real-life readers, *Ask a Manager* will help you successfully navigate the stormy seas of office life.

Qualitative Data Analysis with NVivo Patricia Bazeley,2007-04-12 `In plain language but with very thorough detail, this book guides the researcher who really wants to use the NVivo software (and use it now) into their project. The way is lit with real-project examples, adorned with tricks and tips, but it's a clear path to a project' - Lyn Richards, Founder and Non-Executive Director, QSR International Doing Qualitative Data Analysis with NVivo is essential reading for anyone thinking of using their computer to help analyze qualitative data. With 15 years experience in computer-assisted analysis of qualitative and mixed-mode data, Patricia Bazeley is one of the leaders in the use and teaching of NVivo software. Through this very practical book, readers are guided on how best to make use of the powerful and flexible tools offered by the latest version of NVivo as they work through each stage of their research projects. Explanations draw on examples from her own and others' projects, and are supported by the methodological literature. Researchers have different requirements and come to their data from different perspectives. This book shows how NVivo software can accommodate and assist analysis across those different perspectives and methodological approaches. It is required reading for both students and experienced researchers alike.
