Infant/toddler Environment Rating Scale Thelma Harms, Debby Cryer, Richard M. Clifford, 2003 The ITERS-R is a thorough revision of the widely used program quality assessment instrument, The Infant/Toddler Environment Rating Scale. Designed for use in center-based child care programs for infants and toddlers up to 30 months of age, the ITERS-R can be used by program directors for supervision and program improvement, by teaching staff for self-assessment, by agency staff for monitoring, and in teacher training programs. The established reliability and validity of the scale make it particularly useful for research and program evaluation. Book jacket.

Infant/Toddler Environment Rating Scale (ITERS-3) Thelma Harms, Debby Cryer, Richard M. Clifford, Noreen Yazejian, 2017-07-07 Building on extensive feedback from the field as well as vigorous new research on how best to support infant and toddler development and learning, the authors have revised and updated the widely used Infant/Toddler Environment Rating Scale. ITERS-3 is the next-generation assessment tool for use in center-based child care programs for infants and toddlers up to 36 months of age. ITERS-3 focuses on the full range of needs of infants and toddlers and provides a framework for improving program quality. Further, the scale assesses both environmental provisions and teacher-child interactions that affect the broad developmental milestones of infants and toddlers, including: language, cognitive, social-emotional and physical development, as well as concern for health and safety. ITERS-3 is appropriate for state- and district-wide QRIS and continuous quality improvement, program evaluation by directors and supervisors, teacher self-evaluation, monitoring by agency staff, and teacher training programs. The established reliability and validity of the scale make it particularly useful for research and program evaluation. While the approach to assessing quality and the scoring process remain the same for the new ITERS-3, users will find the following improvements informed by extensive use of the ITERS in the field and by the most recent research: Enhanced focus on interactions and the role of the teacher. Six new language and literacy Items. A new Item on beginning math experiences. Expanded age range to include children from birth to 36 months. A new approach to scoring based solely on observation of ongoing classroom activity (3-hour time sample). The elimination of the parents/staff subscale and teacher interviews, freeing up time for observing more actual classroom practice. Improved indicator scaling, providing more precise and useful scores for use in professional development and self-improvement.

Reduced emphasis on the number of materials, along with greater emphasis on how materials are used to encourage learning. Suitable for use in inclusive and culturally diverse programs, ITERS-3 subscales evaluate: Space and Furnishings Personal Care Routines Language and Books Activities Interaction Program Structure

Infant Toddler Environment Rating Scale Scoring Sheets Thelma Harms,1990-03-01 The 35 items in the ITERS are divided into seven categories: Furnishings and Display for Children -- Personal Care Routines -- Listening and Talking -- Learning Activities -- Interactions -- Program Structure -- Adult Needs.

Video Guide and Training Workbook for the ITERS-R Thelma Harms,Debbly Cryer,2003-05-08 The activities in this 24-page workbook prepare instructors to accurately use the ITERS-R, including explanations for the scoring system, terms used throughout the Scale, protocols for observation, sample situations for scoring practice, and more. This Workbook is to be used in conjunction with the Video Observation for the ITERS DVD, as part of a complete training package. Each participant will require a personal copy of the Video Guide and Training Workbook, which can be reproduced for use in the classroom for educational purposes only.

Provides a stronger method of distinguishing between good and truly excellent programs. Offers a complete training program with ongoing support available at the Environment Rating Scales Institute (ERSI) website (www.ersi.info). ECERS-3 is appropriate for state and district-wide QRIS and continuous improvement; program evaluation by directors and supervisors; teacher self-evaluation; monitoring by agency staff; and teacher education. The established reliability and long term evidence of validity of the ERS family of instruments make this new version of ECERS particularly useful for RTTT-ELC accountability and research. Suitable for use in inclusive and culturally diverse programs, ECERS-3 subscales evaluate: Space and Furnishings Personal Care Routines Language and Literacy Learning Activities Interaction Program Structure

All about the ECERS-R Debby Cryer, Thelma Harms, Cathy Riley, 2003 This resource provides step by step instruction on how to design a quality day care environment. It should be used side by side with the ECERS-R, the scale used to develop and quantify quality standards in Canada, the USA, and abroad. It includes the How, What and Why for Each indicator, seven sub-scale items, step-by-step instructions, and over 700 colour photos. The usage of this book can ensure accurate ECERS-R assessment by: early childhood practitioners, to improve classroom quality; technical staff, wanting to provide guidance to practitioners; licensing staff, who need to evaluate the quality of a program; and researchers, who need to use the scale correctly and reliably. The format is organized to match the format of the assessment, by subscale, item and indicator. They provide clear, print explanations of how each indicator within each item is to be interpreted.

ECERS-E with Planning Notes Kathy Sylva, Iram Siraj, Brenda Taggart, 2010-11-22 ECERS-E is designed to be used with the Early Childhood Rating Scale-Revised (ECERS-R), an internationally recognized measure of quality in education and care written by Thelma Harms, Richard M. Clifford, and Debby Cryer. It not only complements the ECERS-R but extends the

scales to provide additional insights into important aspects of literacy, mathematics, science and environment, as well as practices related to issues of diversity. Given the current focus on emerging literacy and numeracy skills, the ECERS-E provides unique guidance on the kinds of environments that enhance learning in preschool settings. The curriculum domains within the scales bear important relationships to children's (age 3-5) cognitive and social/behavioral developmental outcomes. Using the ECERS-E alongside the ECERS-R gives users a more complete picture of what a high-quality early childhood education program can look like. It can be used by program directors, teaching staff, agency staff, and in teacher training programs. Convenient organization: Literacy Items: Print in the environment Book and literacy areas Adults reading with children Sounds in words Emergent writing/mark making Talking and listening Mathematics Items: Counting and application of counting Reading and representing simple numbers Activities: Shape Activities: Sorting, matching and comparing Science and Environment Items: Natural materials Areas featuring science/science materials Activities: Non living Activities: Living processes Activities: Food preparation Diversity Items: Planning for individual learning needs Gender equality and awareness Race equality and awareness

A Guide to Analyzing and Interpreting ECERS-3 Data Richard M. Clifford, Noreen Yazejian, Wonkyung Jang, Dari Jigjidsuren, 2021 Early childhood is a crucial stage in a child's life, and aspects of the environment in the physical, social-

emotional, cognitive, and health and safety domains all play important roles in shaping children's development during these early years. Having a valid and reliable measure of the quality of these aspects of children's care settings is critical. The Early Childhood Environment Rating Scale (ECERS-3) is the leading research-based instrument for examining these influential global factors that directly impact children in early childhood environments. In this new guide, readers will find an in-depth description of both the conceptual model underlying the ECERS-3 and innovative ways of analyzing data for a fuller understanding of what can be done with the scale and why it is integral to the evaluation of early care and education. The authors analyze a large database of classroom observations to help ECERS-3 users better understand, interpret, and utilize their own findings. Readers will also see how components of their ECERS-3 data relate to one another, within and across subscales, and within the scale as a whole. *A Guide to Analyzing and Interpreting ECERS-3 Data* will assist program directors, agency administrators, preK-K teaching coaches/mentors, school principals, researchers, and others who use the ECERS-3 to more successfully document, interpret, and analyze the quality of essential influential factors in an early learning setting. This resource will help guide program improvement initiatives with insight into what is needed for children's development and learning. **Book Features:** Provides a framework for thinking about how early childhood care and education learning environments fit into the larger picture of influences on children's development. Presents a theory of change that combines understanding how children learn and develop with how early education and care affect long-term outcomes. Analyzes what ECERS-3 data looks like for a large sample of classrooms and by different child and teacher characteristics.

Movement Environment Rating Scale (MOVERS) for 2-6-year-olds Provision Carol Archer, Iram Siraj, 2017 The book presents a new method of measuring the quality of environment and pedagogy in which young children are encouraged to move and be physically active. It applies the methodology used in the ECERS-E and SSTEW rating scales, making it easy for educators already familiar with these well-established scales to adopt.

Teaching Pyramid Infant-Toddler Observation Scale (Tpitos(tm)) for Infant-Toddler Classrooms, Research Edition Kathryn M. Bigelow, Judith Carta, Dwight Wayland Irvin, Mary Louise Hemmeter, 2018-09 The Teaching Pyramid Infant-Toddler Observation Scale (TPITOS(TM)) is an assessment instrument designed to measure the fidelity of implementation of practices associated with the Pyramid Model in center-based infant and toddler care settings. The TPITOS provides a classroom snapshot of the adult behaviors and classroom environment variables associated with supporting and promoting the social-emotional development of infants and toddlers. The tool is made up of items, or categories, of teacher behavior. The three types of items are a) Observational Items, b) Interview Items, and c) Red Flag Items.

Early Childhood Assessment National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Board on Children, Youth, and Families, Committee on Developmental Outcomes

and Assessments for Young Children,2008-12-21 The assessment of young children's development and learning has recently taken on new importance. Private and government organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement, and contribute to better outcomes for children. This book affirms that assessments can make crucial contributions to the improvement of children's well-being, but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used. Early Childhood Assessment addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments.

Bayley Scales of Infant and Toddler Development Nancy Bayley,2006

Visual Impairments National Research Council,Division of Behavioral and Social Sciences and Education,Board on Behavioral, Cognitive, and Sensory Sciences,Committee on Disability Determination for Individuals with Visual Impairments,2002-08-17 When children and adults apply for disability benefits and claim that a visual impairment has limited their ability to function, the U.S. Social Security Administration (SSA) is required to determine their eligibility. To ensure that these determinations are made fairly and consistently, SSA has developed criteria for eligibility and a process for assessing each claimant against the criteria. *Visual Impairments: Determining Eligibility for Social Security Benefits* examines SSA's methods of determining disability for people with visual impairments, recommends changes that could be made now to improve the process and the outcomes, and identifies research needed to develop improved methods for the future. The report assesses tests of visual function, including visual acuity and visual fields whether visual impairments could be measured directly through visual task performance or other means of assessing disability. These other means include job analysis databases, which include information on the importance of vision to job tasks or skills, and measures of health-related quality of life, which take a person-centered approach to assessing visual function testing of infants and children, which differs in important ways from standard adult tests.

Assessing Quality in Early Childhood Education and Care Iram Siraj,Denise Kingston,Edward Melhuish,2015-02-27 The sustained shared thinking and emotional well-being (SSTEW) scale is designed to consider some of the intentional and relational pedagogical strategies strongly associated with child outcomes. It considers practice that supports children aged between two and five years of age in developing skills in sustained shared thinking and emotional well-being, as well as developing strong relationships, effective communication and aspects of self-regulation. It is designed to be used for

research, self-evaluation and improvement, audit and regulation. Using the SSTEWS scale alongside other environment scales (including ECERS-E, ECERS-R or ITERS-R) gives users a more complete picture of what high-quality early childhood education and care can look like. It is aspirational in that it considers high quality pedagogy and practice. It can be used by researchers, heads of centers, managers, teaching staff and practitioners, as well as advisory staff and in professional development.
