Metal Forming Handbook Schuler GmbH, 2012-12-06 Following the long tradition of the Schuler Company, the Metal Forming Handbook presents the scientific fundamentals of metal forming technology in a way which is both compact and easily understood. Thus, this book makes the theory and practice of this field accessible to teaching and practical implementation. The first Schuler Metal Forming Handbook was published in 1930. The last edition of 1966, already revised four times, was translated into a number of languages, and met with resounding approval around the globe. Over the last 30 years, the field of forming technology has been radically changed by a number of innovations. New forming techniques and extended product design possibilities have been developed and introduced. This Metal Forming Handbook has been fundamentally

revised to take account of these technological changes. It is both a text book and a reference work whose initial chapters are concerned to provide a survey of the fundamental processes of forming technology and press design. The book then goes on to provide an in-depth study of the major fields of sheet metal forming, cutting, hydroforming and solid forming. A large number of relevant calculations offers state of the art solutions in the field of metal forming technology. In presenting technical explanations, particular emphasis was placed on easily understandable graphic visualization. All illustrations and diagrams were compiled using a standardized system of functionally oriented color codes with a view to aiding the reader's understanding.

Marble Past, Monumental Present Michael Greenhalgh, 2009 This survey and synthesis of the structural and decorative uses of Roman remains, particularly marble, throughout the mediaeval Mediterranean, deals with the Christian West - but also Byzantium and Islam, each the inheritor of much Roman territory. Recent Development of Electrospinning for Drug Delivery Romána Zelkó, Dimitrios A. Lamprou, István Sebe, 2020-03-27 Several promising techniques have been developed to overcome the poor solubility and/or membrane permeability properties of new drug candidates, including different fiber formation methods. Electrospinning is one of the most commonly used spinning techniques for fiber formation, induced by the high voltage applied to the drug-loaded solution. With modifying the characteristics of the solution and the spinning parameters, the functionality-related properties of the formulated fibers can be finely tuned. The fiber properties (i.e., high specific surface area, porosity, and the possibility of controlling the crystalline-amorphous phase transitions of the loaded drugs) enable the improved rate and extent of solubility, causing a rapid onset of absorption. However, the enhanced molecular mobility of the amorphous drugs embedded into the fibers is also responsible for their physical-chemical instability. This Special Issue will address new developments in the area of electrospun nanofibers for drug delivery and wound healing applications, covering recent advantages and future directions in electrospun fiber formulations and scalability. Moreover, it serves to highlight and capture the contemporary progress in electrospinning techniques, with particular attention to the industrial feasibility of developing pharmaceutical dosage forms. All aspects of small molecule or biologics-loaded fibrous dosage forms, focusing on the processability, structures and functions, and stability issues, are included.

Pakistan Occupied Kashmir Surinder Kumar Sharma, Yaqboob ul Hassan, Ashok K. Behuria, 2019 This book is a result of research undertaken on the subject by the scholars associated with the IDSA project on Pakistan Occupied Kashmir (PoK) - also known as Pakistan Occupied Jammu and Kashmir (PoJK) - which includes both the so-called Azad Jammu and Kashmir (AJK) and Gilgit-Baltistan (GB). This was legally a part of the erstwhile princely state of Jammu and Kashmir, which acceded to India in October 1947. The authors of this book seek to provide a critical analysis of the politics of the above mentioned two regions within PoK; throw light on the genesis and evolution of various political parties and interest groups, and acquaint the readers with different personalities playing important role in politics therein. The main aim of the publication is to help the scholars, analysts, and policy-makers to understand the dynamics of the political systems in PoK, the complex interaction of these systems with the government in Islamabad and the responses of the local leadership to Pakistan's strategy of keeping them under strict control in the name of representative governance over the last 70 years.

Affirming Diversity Sonia Nieto, Patty Bode, 2012-08-17 This best-selling text explores the meaning, necessity, and benefits of multicultural education-in a sociopolitical context-for students of all backgrounds. Sonia Nieto and Patty Bode look at how personal, social, political, cultural, and educational factors affect the success or failure of students in today's classroom. Expanding upon the popular case-study approach, *Affirming Diversity: The Sociopolitical Context of Multicultural Education* examines the lives of real students who are affected by multicultural education, or the lack of it. This social justice view of multicultural education encourages teachers to work for social change in their classrooms, schools, and communities.

The Art and Architecture of Islam 1250-1800 Sheila S. Blair, Jonathan M. Bloom, 1996-09-25 They discuss, for

example, how the universal caliphs of the first six centuries gave way to regional rulers and how, in this new world order, Iranian forms, techniques, and motifs played a dominant role in the artistic life of most of the Muslim world; the one exception was the Maghrib, an area protected from the full brunt of the Mongol invasions, where traditional models continued to inspire artists and patrons. By the sixteenth century, say the authors, the eastern Mediterranean under the Ottomans and the area of northern India under the Mughals had become more powerful, and the Iranian models of early Ottoman and Mughal art gradually gave way to distinct regional and imperial styles.
