Historical Painting Techniques, Materials, and Studio Practice Arie Wallert, Erma Hermens, Marja Peek, 1995-08-24
Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled Historical Painting Techniques, Materials, and Studio Practice at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

[The Shock Doctrine](#) Naomi Klein, 2014-10-02 'Impassioned, hugely informative, wonderfully controversial, and scary as hell' John le Carré Around the world in Britain, the United States, Asia and the Middle East, there are people with power who are cashing in on chaos; exploiting bloodshed and catastrophe to brutally remake our world in their image. They are the shock doctors. Exposing these global profiteers, Naomi Klein discovered information and connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling tale of how a few are making a killing while more are getting killed. 'Packed with thinking dynamite ... a book to be read everywhere' John Berger 'If you only read one non-fiction book this year, make it this one' Metro Books of the Year 'There are a few books that really help us understand the present. The Shock Doctrine is one of those books' John Gray, Guardian 'A brilliant book written with a perfectly distilled anger, channelled through hard fact. She has indeed surpassed No Logo' Independent

America and Guerrilla Warfare Anthony James Joes,2004 On December 26, 2004, a massive tsunami triggered by an underwater earthquake pummeled the coasts of Thailand, Indonesia, Sri Lanka, and other countries along the Indian Ocean. With casualties as far away as Africa, the aftermath was overwhelming: ships could be spotted miles inland; cars floated in the ocean; legions of the unidentified dead—An estimated 225,000—were buried in mass graves; relief organizations struggled to reach rural areas and provide adequate aid for survivors. Shortly after this disaster, researchers from around the world traveled to the region’s most devastated areas, observing and documenting the tsunami’s impact. The Indian Ocean Tsunami: The Global Response to a Natural Disaster offers the first analysis of the response and recovery effort. Editors Pradyumna P. Karan and S. Subbiah, employing an interdisciplinary approach, have assembled an international team of top geographers, geologists, anthropologists, and political scientists to study the environmental, economic, and political effects of the 2004 Indian Ocean tsunami. The volume includes chapters that address the tsunami’s geo-environmental impact on coastal ecosystems and groundwater systems. Other chapters offer sociocultural perspectives on religious power relations in South India and suggest ways to improve government agencies’ response systems for natural disasters. A clear and definitive analysis of the second deadliest natural disaster on record, The Indian Ocean Tsunami will be of interest to environmentalists and political scientists alike, as well as to planners and administrators of disaster-preparedness programs.

Corpus Anarchicum Hamid Dabashi, 2012-09-24 This book is a meditation on and an attempt to understand suicidal violence in the immediate context of its most recent political surge: the decade between 2001 and 2011, from the suicidal mission of Muhammad Atta and his band in the United States to the suicide of Mohamed Bouazizi in 2010 in Tunisia. After the former a devastating military strike and occupation of two Muslim countries commenced, and after the latter a massive transnational democratic uprising ensued. Suicidal violence is neither specific to Islam nor peculiar to our time. It has been manifested in practically all cultures and religions and throughout human history. But the suicidal violence we witness today is of an entirely different disposition because the bodies (both of the assailant and of the assailed) on which it is perpetrated are no longer the human body of our Enlightenment assumption. What we are witnessing is in fact the contour of a posthuman body. The posthuman body, as Dabashi here proposes, is the body of a contingent and contextual being, and as such an object of disposable knowledge; while the human body that it has superseded was corporeally integral, autonomous, rational, indispensable, and above all the site of a knowing subject.

Zombie Capitalism Chris Harman,2010 We've been told for years that the capitalist free market is a self-correcting perpetual growth machine in which sellers always find buyers, precluding any major crisis in the system. Then the credit crunch of August 2007 turned into the great crash of September-October 2008, leading one apologist for the system, Willem Buiter, to write of the end of capitalism as we knew it. As the crisis unfolded, the world witnessed the way in which the runaway speculation of the shadow banking system wreaked havoc on world markets, leaving real human devastation in its wake. Faced with the financial crisis, some economic commentators began to talk of zombie banks--financial institutions that were in an undead state and incapable of fulfilling any positive function but a threat to everything else. What they do not realize is that twenty-first century capitalism as a whole is a zombie system, seemingly dead when it comes to achieving human goals.

Cement Replacement Materials Ali Akbar Ramezaniapour,2013-09-24 The aim of this book is to present the latest findings in the properties and application of Supplementary Cementing Materials and blended cements currently used in the world in concrete. Sustainability is an important issue all over the world. Carbon dioxide emission has been a serious problem in the world due to the greenhouse effect.
