Uniting of Europe Ernst B. Haas, Ernst Haas, Dr, 2020-11-15 The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the power to redirect the loyalties and expectations of political actors. In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a united Europe took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political scientists and historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

Golden Gulag Ruth Wilson Gilmore, 2007-01-08 Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called the biggest prison building project in the history of the world. *Golden Gulag* provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles, weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated young people of color, and the increase in punitive justice such as the three strikes law—pose profound and troubling questions for the future of California, the United

States, and the world. Golden Gulag provides a rich context for this complex dilemma, and at the same time challenges many cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion.

A New Direction for China's Defense Industry Evan S. Medeiros,Roger Cliff,Keith Crane,James C. Mulvenon,2005-12-19 Since the early 1980s, a prominent and consistent conclusion drawn from research on China's defense-industrial complex has been that China's defense-production capabilities are rife with weaknesses and limitations. This study argues for an alternative approach: From the vantage point of 2005, it is time to shift the focus of current research to the gradual improvements in and the future potential of China's defense-industrial complex. The study found that China's defense sectors are designing and producing a wide range of increasingly advanced weapons that, in the short term, are relevant to a possible conflict over Taiwan but also to China's long-term military presence in Asia. Part of a larger RAND Project AIR FORCE study on Chinese military modernization, this study examines the current and future capabilities of China's defense industry. The goals of this study are to 1.

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith,2011 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from

1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Reinventing the Research University Weber L. (ed), Duderstadt J. J. (ed), 2004 The fourth Glion Colloquium, which was held in Glion above Montreux, Switzerland, in June 2003, drew together active university leaders (presidents, rectors, vice-chancellors), along with guests from industry with close ties to academe, to compare perspectives on the future of the research university in America and Europe, as reflected in its title, 'Reinventing the Research University'. Although there was considerable discussion about whether it would be more accurate to use other verbs such as 'reforming', 'renewing' or 'refocusing', there was general agreement that change would characterize the future of the research university, driven by powerful social, economic and technological forces driving change in our world. The papers contained in this book reflect both the consensus and differences in the perspectives of the participants on these issues. In Part I, papers set the stage by considering the forces that are likely to change the nature of the research university. In Part II, the authors discuss the changing nature of education and scholarship. Part III then continues with papers on the changing nature of the interaction between the research university and broader society. In Part IV, the authors discuss the challenges of financing and governing the contemporary research university. In the concluding chapter the editors endeavour to pull together these

discussions to develop more specific suggestions concerning the issues and strategies that universities should consider as they approach a period of rapid change. [Publisher, ed].
