Digital Peripheries Petr Szczepanik, Pavel Zahrádka, Jakub Macek, Paul Stepan, 2020-05-15 This is an open access book. Media industry research and EU policymaking are predominantly tailored to large (and, in the latter case, Western) European markets. This open access book addresses the specific qualities of smaller media markets, highlighting their vulnerability to global digital competition and outlining survival strategies for them. New online distribution models and new trends in the consumption of audiovisual content are limited by, and pose new challenges for, existing audiovisual business models and their legal framework in the EU. The European Commission's Digital Single Market (DSM) strategy, which was intended e.g. to remove obstacles to the cross-border distribution of audiovisual content, has triggered a heated debate on the transformation of the existing ecosystem for European screen industries. While most current discussions focus on the United States, Western Europe, and the multinational giants, this book approaches these industry trends and policy questions from the perspective of relatively small and peripheral (in terms of their population, language, cross-border cultural flows, and financial and/or symbolic capital) media markets.

Lean Thinking James P. Womack,Daniel T. Jones,2013-09-26 Lean Thinking was launched in the fall of 1996, just in time for the recession of 1997. It told the story of how American, European, and Japanese firms applied a simple set of principles called 'lean thinking' to survive the recession of 1991 and grow steadily in sales and profits through 1996. Even though the recession of 1997 never happened, companies were starving for information on how to make themselves leaner and more efficient. Now we are dealing with the recession of 2001 and the financial meltdown of 2002. So what happened to the exemplar firms profiled in Lean Thinking? In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date. Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition.

Indonesian Cinema Krishna Sen,1994 Indonesia's quasi-military dictatorship has sought since 1965 to mould Indonesian society into a male-oriented, capitalist, Javanese-dominated national framework. Cinema and television are the most closely-controlled mass media in Indonesia, and films for mass consumption have played an important role in the government's vast socio-political engineering project. Krishna Sen describes the background and present-day Indonesian film industry and explores how the country's society and history are represented in its film culture. From a critique of four films, she concludes that Indonesian cinema privileges the military against the civilian, the middle class against the popular classes, and men against women. Backed by careful documentation from cinema literature, this is a radical, in-depth perspective on film - its implications, its vulnerability to manipulation and its artistic and propagandist value.

Architectural Modelmaking Nick Dunn,2014-09-30 The physical model is an important communication tool for architects. Although the proliferation of CAD programs has enabled the creation of increasingly complex computer models and virtual environments, there is also a growing need to address the three-dimensional qualities of architecture that may be lost when using such media. This book focuses on the inspiring possibilities for modeling the built environment with all the different media and techniques available. In describing the use of different models in different contexts, the book provides a practical guide to how and why models are used and what they are used for. This second edition includes more detailed step-by-step exercises, expanded discussion of materials and techniques, and updated coverage of digital techniques.
